Visir

By Pierre Sindre

Visir table lamp is an homage to the classic portable oil lamp. New LED technique and efficient rechargeable battery makes it possible to design and create neat and beautiful lamps again. Lamps that you can bring along to lighten up dark areas or just to create a magic feeling wherever you go.

Tell

By Addi

A seemingly traditional luminaire with Örsjö's strict design language and honest materials with modern technology and a playful twist.

Punkt

By Joel Karlsson

Punkt is closely related to Örsjö's successful Streck wall lamp and the pendant Maxi that was in the Örsjö collection in the 1960's. Designed to provide a beautiful indirect light, Punkt's shade features an innovative two-layer construction that conceals all of its technological elements.

The Crown

By Malin Mena

The Crown is a blown-glass chandelier that pushes at the limits of material possibility. Assembled from chains of blown-glass bulbs that are suspended around an underlying metal structure, The Crown is an amphora-shaped chandelier that glows with a soft, verdigris light.

Visir

By Pierre Sindre

Designed to function as a fixed sconce, Visir is Sindre's homage to a forgotten typology. Visir's diffuse light creates softly glowing coronas as the metal hood reflects light backwards onto the wall.
